See the difference between the High Speed Sandwich Press and a Traditional Panini Grill in the comparison* below.

* Based on internal tests.

High Speed Sandwich Press. Fast food, fast business!

Do you want to increase your business by serving delicious food in a short amount of time?

Food Type

Hot sandwiches and wraps with different kinds of breads, fillings (meat, cheese, fish, vegetables) and dressings.

Performance*

- Starting temperature: 39° F (refrigerated sandwich)
- Core temperature at the end of the cooking phase: 140° F
- Sandwich weight: 12.3 oz.
- Cooking time: less than 60 seconds
- Result: toasted bread with grill marks and no food remaining on the cooking surface

*performance can slightly vary depending on the filling

Innovative features

- Combination of 3 heating modes:
 - Contact plates
 - Infrared radiation
 - Microwaves
- Non-stick contact surface
- Self-adjusting upper plate
- Automatic holding
- Automatic lid opening at the end of the cooking phase
- Programmable electronic control
- Energy saving mode

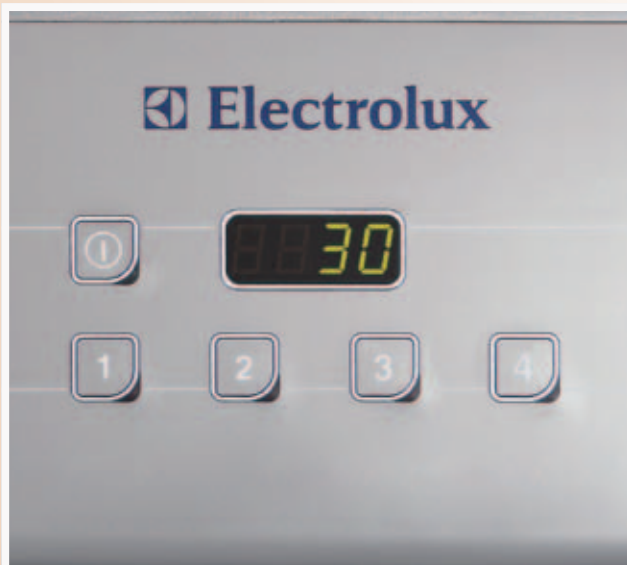

4 different programs/cooking phases

4 automatic programs* available to prepare different sandwich variations and to make operations extremely easy. Just press a button and serve your customer.

*The variable parameters are:

- Top plate temperature**
- Bottom plate temperature**
- Total cooking phase time
- Microwave phase time

**temperature will be the same for all cooking cycles

LED digital display showing cooking countdown

*US PATENT: US7507939 dated 3/24/09

Title: Cooking apparatus having a microwave generator.

Self-adjusting upper plate

- Adjustable height: from .31" to 2.95" (8 to 75 mm)

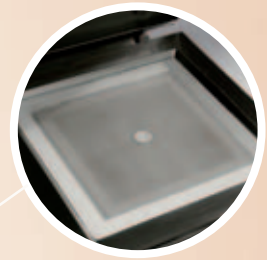

Moisture exhaust grid

A stainless steel grid positioned next to the top plate extracts excess humidity leaving your sandwiches crispy and tasty

Top plate

- Aluminum ribbed plate
- Non-stick coating
- Temperature up to 482° F
- Dimensions: 8.46" x 8.46" (215 x 215 mm)

Bottom plate

- Glass quartz smooth plate
- Non-stick surface
- Dimensions: : 9.84" x 9.84" (250 x 250 mm)
(Net cooking area: 8.46" x 8.46") (215 x 215 mm)

Automatic holding and opening system

- Automatic holding system during the cooking phase (upper lid stays closed)
- Automatic deactivation of the holding system at the end of the cooking phase (upper lid opens)
- Machine restarts only when the lid is closed

Electro Magnet

The holding system is controlled by an electro magnet which is activated when the lid is closed and deactivated as soon as the cooking phase ends (countdown)

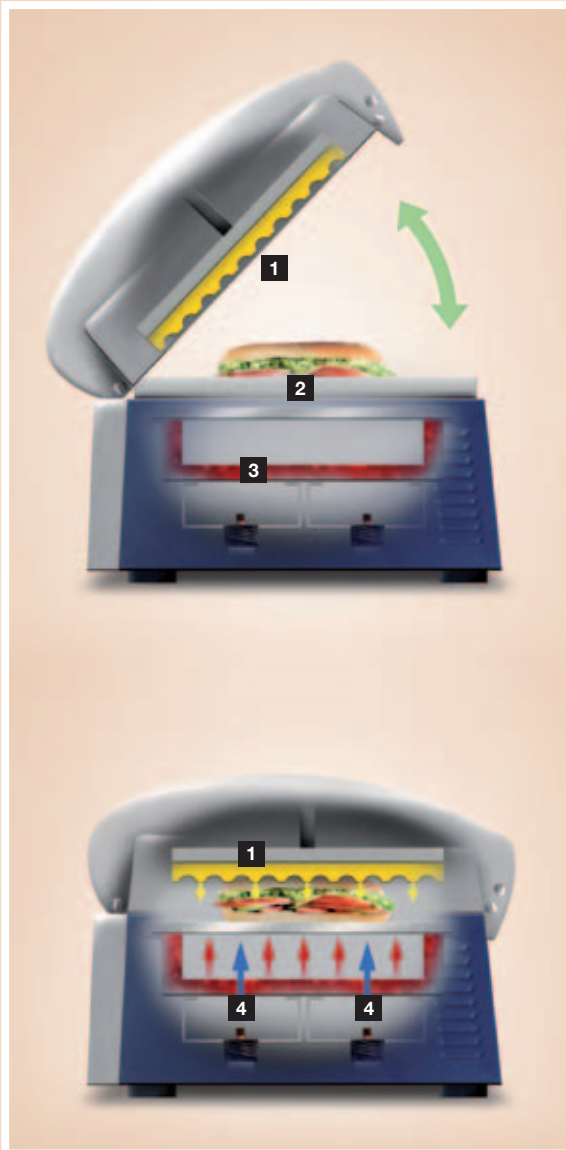

Speed

Great tasting, hot, toasted sandwiches with grill marks in less than 60 seconds

High Speed Sandwich Press. A unique achievement in hot sandwiches.

By combining 3 different heating sources, you can prepare and serve the best sandwiches on the market in less than one minute

Speed

Up to 6 times faster than a standard sandwich grill* while offering the highest quality.

The High Speed Sandwich Press can grill a tasty and warm-to-the-last-bite sandwich in only 30 seconds!

*depending on the filling

Quality

Higher food quality in terms of taste, grill marks, crispness, flavor and nutritional values (vitamin and protein preservation). The result: a perfectly toasted sandwich, warm throughout, directly from the refrigerator to the plate in a few seconds.

Warm to the very last bite!

1 Contact heating plate

Perfect grill marks for an appetizing presentation

2 Glass quartz plate

Due to the non-stick coating, food residue does not remain on the plates

3 Infrared heater

Delicious crispy sandwiches in record times

4 Microwave

Sandwiches that are warm inside and out

Total installed power:	5 kW	External dimensions:	24.8" x 14.21" x 26.57" (630 x 361 x 675 mm)
Top plate power:	0.9 kW	Cooking plate dimensions:	
Bottom plate power:	0.9 kW	Top plate:	8.46" x 8.46" (215 x 215 mm)
Microwave power:	1.8 kW	Bottom plate:	8.46" x 8.46" (215 x 215 mm)

Very fast. Easy to use.
Easy to clean.
